[Rolls-Royce Phantom - pricing and options announced](#)

Rolls-Royce Motor Cars have announced further details of the Individual and Theatre rear seat options for the new Phantom, which were unveiled at the Geneva motor show in March. Official prices for the motor car, including options list, have also been published.

Rolls-Royce Phantom customers can now choose from Lounge seats or Individual rear seat arrangements. Individual seats come with the same power adjustments as the front seats, and are separated by a capacious centre console. Through The Rolls-Royce Bespoke Programme this console can house any number of personally specified components, such as a chiller and drinks cabinet.

The Theatre configuration enhances the individual seat arrangement further. A DVD entertainment system offers rear passengers a chance to relax whilst watching 6.5inch monitors, housed in the back of the front seats. These monitors are concealed by sliding doors when not in use. The centre console houses headphone sockets and the six-disc DVD changer is fitted under the seat. There is a second, foldaway Central Controller that operates the rear DVD, TV and sound systems, allowing rear passengers to listen to a separate audio source from those in the front cabin

Another option for the Phantom is a special crossbanded wood veneer feature. This displays the talents of the craftsmen in the wood shop at Goodwood, with marquetry applied to the larger interior wooden panels, such as the door cappings.

Pricing information for the new Rolls-Royce Phantom has been released in four major currencies, Sterling, Euro, US Dollar and Yen - (Prices subject to destination charges and local sales tax)

- Sterling £214,500
- Euro €320,000
- US Dollar \$320,000
- Yen ¥40,500,000

Options price list, February 2003:

Individual Seats: £4,700 €7,000 \$7,200 ¥897,000

Theatre Configuration: £8,000 €12,000 \$12,300 ¥1,537,000
