Spikes and sideburns - the Deus ex Machina Snow Quake

Lead

Inspired by the success of the 'Dirt Quake' motorcycle meet-ups held in the UK, custom workshop Deus ex Machina organised a similar event in Italy – albeit on an ice-racing circuit, thus creating the first 'Snow Quake'...

With entry restricted to 'inappropriate' machines, the first Snow Quake was a sight to behold. Watch as scooters, choppers, flat-track racers and vintage scramblers slide their way around the Ice Rosa Ring, located in a mountainous valley in Vercelli, Northern Italy.
