Innenausstattung	Leder	Metallic	Ja

Beschreibung

Modelyear '94, the last year of production, the popular 964-series saw its final encore: the limited 964 Carrera 4 WTL (Works turbo look). Only 174 examples were produced (against 911 of the 30 years jubilee edition), what makes this WTL one of the rarest and most sought after 964's. Our car was ordered in Midnight blue métallique and dark blue leather, what makes for an impressive though stylish look. This is an original Belgian car, delivered by RS motors, and has covered 168.000km since new. She finds herself in a stunning condition throughout and has benefitted from one respray in the original color. The first owner has ordered a long list of options, which only adds to the cars' attractiveness. The original radio and rear bonnet come with the car, the two-pieces 18" rims complete the sporty looks. This is a great opportunity to acquire one of the rarest 964!
