The last owner, a well-known collector of only the best examples of special Porsche models acquired the GT2RS in February 2020. Immediately following purchase the car was dispatched to his regular Porsche dealer, Porsche Teesside, for replacement of the leather steering wheel, handbrake lever and gear knob with original equipment Alcantara items. In addition, the original Adaptive sports seats were replaced with new Porsche folding bucket items, an original option for the GT2 RS model. The original leather parts and seats accompany the car as does the invoice from Porsche Teesside for their replacement. Obviously, it would be easy to reverse these changes if a new owner desired.

The 997 GT2RS remains one of the most exciting 911 variants of all time to drive and this example in as new condition requires nothing other than to be driven and enjoyed by a new owner. It comes with all books, including original stamped service book in the correct wallet, service invoices, MOT certificates, all tools, keys and the above mentioned original internal parts.
