Beschreibung

We are proud to present you this opportunity to become the owner of this Austin Healey 3000 "Works replica". Recently purchased by us with the intention to build something very special. Because this is something you don't find every day!

The previous owner's profession was panel beater and many hours were put into the base for this Works Healey. The chassis and the inner body parts were extensively restored, adjusted where necessary and reinforced at the suspension points and in the chassis beams. Everything to make this car a perfect and smooth driving car. All the features of the Works cars are present. Think of the air vents in the front screens, the aluminum grille, spotlights on the front shroud, trunk lid with recess (this is made of aluminum instead of plastic) and the hardtop. But as an extra, a side exhaust has also been made, which gives this car a unique look.

We will continue the work and will use all possible options and upgrades, but it is of course also possible as a new owner to step into this project and have everything completely finished to your wishes and preferences. We look forward to being able to perform this for you and to create a unique Austin Healey together. We invite you to discuss this further in our showroom in Dirksland.
