UK Sees Audi TT Upgrades - at No Extra Cost

All UK versions of the Audi TT Coupe and Roadster quattro are being equipped with an enhanced specification at no addition to the on-the-road prices, which range from £24,050 to £29,000. The improved spec includes larger 18-inch alloy wheels and further lowered sports suspension, while 225bhp versions also gain titanium headlamp surrounds. Standard metallic and pearl effect paints are now free of charge.

As a gesture of goodwill, UK customers with current orders being built without the extra equipment are being offered the upgrades. And existing owners of the TT S-line are being offered full reimbursement for the cost of the additional specifications.
