Crazy Golf Carts

Things are changing down on the golf course. If not entirely suitable for the Royal and Ancient, the latest craze in America is for customised buggies reflecting the very latest in 'bling' motoring. A Hummer H2 for the country club anyone?

Custom-made bodies are attached to regular modern chassis made by the likes of Club Car, EZ-Go or Yamaha. Further detailed accessories such as leather seats, bumpers and lights are then added. The customer can specify individual colours and finishes – just like on the real car. There's also the possibility of adding some monster low-profile wheels and tyres, as preferred by the baddest dudes in town.

The company that makes them, Luxury Carts, will happily provide you with every possible extra. It's as simple as how deep your pocket is. For the slightly less well off, the company will also supply the carts in kit form.

The H2 Hummer Golf Cart's base price is \$17,950.00, and has the following features:

- Built on All Aluminium Club Car Chassis
- 3.75 hp Electric Motor
- 450 amp Controller for Speeds up to 20 mph
- 2 Passenger Seating
- Street Legal NEV
- 6" Spindle Lift Kit
- Head Lights / Turn Signals / Brake Lights
