

CLASSIC DRIVER

Overfinch Range Rover Sport

Development is well advanced for a new 500 bhp version of the Range Rover Sport by Overfinch.

The most sporting of Land Rover's models has been treated to an entirely new look courtesy of Overfinch. Aerodynamic bodystyling has significantly changed the appearance of the vehicle to give even more sporting intent. A new exhaust with twin oval tailpipes underlines the massive power potential. Overfinch's popular Tiger 22" wheels now completely fill the wheel arches. The design sketches are the first pictures of what the new model will look like.

Predicted Performance:-

Top Speed 156 mph (250 kph)

0-60 mph (100 kph) 5.9 seconds (6.2 seconds)

Overfinch will start deliveries in Autumn 2005 and as with all Overfinch products the Engine, Wheels, Exhaust and Aerostyling will all be available separately. Orders are now being taken for this unique and real sporting alternative to a Cayenne Turbo.
