Lamborghini Gallardo SE

The Lamborghini Gallardo SE, which is limited to 250 units, is characterized by a two-tone body paint, an even more sporty interior and technical improvement. It is equipped with a permanent 4WD, 6 speed gearbox, aluminum space frame, ESP and ASR, ABS, ABD, air conditioning, as well as two front and two side airbags.

The color range consists of six alternatives: two grey shades as well as white (Balloon white), yellow (Giallo Midas), Orange (Arancio Borealis) and green (Verde Ithaca). The roof, the engine bonnet, the front and rear spoiler as well as the two side mirrors are painted in black (Nero Noctis) making them stand out against the body color. The rear lights are slightly tinted. The newly designed "Callisto" rims give an extra touch to the overall appearance which is complemented by the colored brake calipers (available in grey or yellow).

The interior design sets forth the two-tone concept by having all piping and stitching matching the exterior body color of the car. The Lamborghini shield is embossed on the headrest of the driver and passenger seat. The Lamborghini script is preciously inserted into the dashboard. The carpets are black having the borders again matching the exterior body color of the car. Needless to say that the entire interior is handcrafted in leather partially perforated and of supreme quality.

The interior design underlines the new, more aggressive personality of this Special Edition. Exclusively for the Lamborghini Gallardo SE: an additional shield with the embossed vehicle identification number.

The limited Special Edition is also equipped with standard features such as a rear view camera, which in combination with the build in multimedia screen facilitates parking. The sports suspension with the sports steering wheel and in combination with the P Zero Corsa tyre (specifically developed by Pirelli) are all

standard features on the SE.

Upon request a vast range of additional equipment is available. A customer can choose additionally the paddle/sequential gearbox **e.gear**, as well as a navigation system (depending on the country), heated side mirrors, fully electrical and heated seats. A winter package (heated seats, side mirrors, heated wash jets, rubber floor mats, 12 Volt outlet), and a lifting system are also available. Standard tyres instead of sports tires can be ordered without surcharge.

The Gallardo SE benefits from several technical modifications:

The gearbox is now equipped with shorter gear ratios in the first five gears, enhancing the dynamic performance of the vehicle. The result is also shown in the acceleration from 0-100km/h in 4.0 seconds which improved by 0.2 seconds, achieving a top speed of 315 km/h versus 309 km/h previously. This is shown impressively on an e.gear equipped car with a feature called "thrust mode", optimizing acceleration and gear change from a standing start throughout all gears. The more direct and precise steering are additional modifications carried out to improve even more the superb handling of the vehicle.

The Gallardo SE will be available from September onwards. In Europe it will be available at a list price of EUROS 141.500, -- excl.VAT.
