
Aston Martin DBRS9s to race at Sebring in March

19 January 2006 | Classic Driver

Barry Wagner, Chief Engineer of Autosport Designs Racing (ASDR) announced today that they will be contesting all ten rounds of the 2006 SCCA Speed World Challenge Series with two Aston Martin Racing DBRS9s.

"We are delighted to be involved with Aston Martin's return to GT racing in the United States with two SCCA World Challenge specification DBRS9's. We look forward to working closely with Aston Martin Racing during the year to ensure the DBRS9's success".

Tom Papadopoulos (USA) and Johnny Mowlem (GB) will drive the Autosport Designs Racing DBRS9s for the full 2006 World Challenge season. Tom and Johnny bring extensive experience from both sprint and endurance racing to the team.

The DBRS9 - the prototype car above seen testing at Bahrain last year - is a racing derivative of the critically acclaimed, road-going DB9. This new V12-engined race car is expected to be a formidable

challenger for the 2006 season.

Editor's note - We wish Tom, Barry and the team every success in 2006. Click **HERE** to see Autosport Designs full inventory on **Classic Driver**.
