The next step: 47 WallyPower

With the 47 WallyPower the Italian designers have produced a luxury boat that's positioned between the WallyTender and the Daycruiser 70 WallyPower.

This 47-foot (14.30 metre) motor boat features a large, yet sheltered, deck area including the navigation/steering console and social cockpit. The well-protected and shaded central living area is equipped with a bimini top, and a dining table with comfortable seating for six - eight guests.

The forward and aft areas feature sun pads, while the retractable swimming ladder is hydraulically operated and concealed in the stern. The extensive and unobstructed deck is laid with non-slip teak for safety and comfort under foot. The accommodation is for three guests in two separate cabins; the large cabin with a full double bed to forward with a single cabin on the starboard side.

The simple and stylish interior includes a fully equipped galley, and a bathroom with basin, head and shower. The design combines carbon fibre mixed with natural teak, and white painted cabinets and ceiling. The two diesel engines generate 880 Hp and are driven by KaMeWa waterjets. Fuel tank capacity is 2,000 liters (528 US gal) allowing a range of 500 nautical miles.

The base price for the 47 WallyPower is 800.000 Euro. For further information please visit www.wally.com.
