
"Fire and Ice" in Iceland

24 November 2006 | Classic Driver

The volcanic rocks and misty mountains with waterfalls and glacial lakes of Iceland were the location for the first photo shoot of the latest convertible from Aston Martin. René Staud Studios were responsible for the inspiring shots, and have now released a calendar featuring 12 of the very best photographs.

1 2 3 4 5 6 7 8 9 10 11 12 13 14 15 16 17 18 19 20 21 22 23 24 25 26 27 28 29 30 31

ASTON MARTIN
APRIL

Entitled "Fire and Ice", and carrying official Aston Martin sanction, the dramatic images show the sublime 21st century lines of the Aston Martin V8 Vantage Roadster set against a backdrop of primeval geological formations.

The calendar is large size (48 x 68 cm), and printed in 6-colours on high quality, 250 gms paper. Additional pages show images from the production of the shots.

For further information on the Aston Martin Calendar 2007 "Fire and Ice", please visit www.fire-and-ice.info. You can also order it online at www.renestaud.com.
