Videos of the New Stratos in Action

First driving impressions of the new Stratos: the development team behind Michael Stoschek has released two dramatic videos showing more details of the New Stratos in action - firstly, at speed on the Balocco test track, with former WTCC and F1 driver Tiago Monteiro at the wheel...

...while the second video sees the **New Stratos** in its final wind-tunnel testing with **Pininfarina** in **Turin**, on 13 September 2010. We also have further pictures - including an image which clearly shows how compact the **Stratos** is, compared with its donor car, the **Ferrari 430**.

The new **Stratos** will be officially unveiled at the end of November.
