

CLASSIC DRIVER

Tribute Vespa

Two icons of Italian life, the Vespa and the wooden speedboats made by Riva, have been brought together in an intriguing product from New Zealand company Digital Veneer.

The limited-edition '**Tribute Vespa**' is, according to its makers, the ultimate 'shoreside tender' – quite an addition to a superyacht, when it comes to onshore transport for the jet set of **St Tropez**. **Digital Veneer's** 'Mahogany' mirror finish – a lightweight alternative to real wood – transforms each brand-new Vespa into 'an authentic and unique work of art', complemented by a hand-stitched leather seat, another element reminiscent of luxury speedboats.

For more information on the **Tribute Vespa**, and other products from **Digital Veneer**, see www.digitalveneer.com.
