[Aston Martin Cygnet on the Streets of London](#)

Parking in London is always tricky, but finding a spot not just on the Brompton Road but actually *inside* Harrods? Well, that's an achievement...

...and it's just what the clever engineers from **Gaydon** have done with the 'city friendly' **Aston Martin**, the **Cygnet**, which will be launched in 2011.

It's called 'spatial efficiency'.

A red **Cygnet** will be on display in one of London's top stores, **Harrods**, until Saturday 11 December. Prospective customers for the high-quality runaround can already order one through the European **Aston Martin** dealer network.
