[Video: Luca di Montezemolo Tests New Stratos](#)

As coups go, this was a big one. The manufacturer of the 'new' Lancia Stratos has got Ferrari Chairman Luca di Montezemolo behind the wheel of its soon-to-revealed supercar at none other than the Fiorano test track.

The short video – with few words other than a “well done on the technical point of view...” from **Montezemolo** – shows the Ferrari V8-powered car driven by the **Chairman**, accompanied by the German prime mover behind the project, **Michael Stoschek**.

Montezemolo is no stranger to the hot seat of a high-performance **Lancia** as, in the early 1970s, he was briefly a member of the **HF Squadra Corse** team. The famous **Stratos** rally car hit the heights of competition success in the mid-70s at the same time as the now **Chairman of Ferrari** was running the **Maranello** company's **Formula One** operation.
