[Video: Ferrari FF in High-Speed Testing](#)

Following Ferrari's shock announcement last week, that pictures of its new FF, the first ever four-wheel drive from the Prancing Horse, were live on the Ferrari website, a dramatic video has now been released.

The video shows the four-seater Ferrari in high-speed testing on snow - in Tierra del Fuego, Finland and Sweden.

Hot on its heels came a second video - this time on the more familiar Tarmac surface of the Balocco proving ground; although it does - unusually - take place at night...

But we'll have to wait till March, and the Geneva motor show, to see the new Ferrari in the metal.
