Bentley Mulsanne Executive Interior Concept: Rolling Boardroom

Bentley has created a specially-tailored interior for its flagship Mulsanne model, which allows passengers to continue working while being whisked across the country.

The top-end Mulsanne is equipped with a variety of business, comfort and entertainment features, giving the owner the opportunity to conduct business or relax in a pleasant atmosphere. Facilities include two Apple iPad workstations integrated into the rear seat folding tables, as well as a large retractable LED screen connected to an Apple Mac Mini computer. The extra work required to turn the Mulsanne into a boardroom on wheels is approximately 170 hours.
