
Breitling Transocean Unitime: Cosmopolitan chronograph

12 March 2012 | Classic Driver

The latest in-house movement from Breitling, the B05, brings 24-zone time-travelling for the professional globetrotter.

Launched at Baselworld 2012, Breitling's latest masterpiece features a 'double disc' display on its outer dial that can be easily rotated to show not only the local and home time, but also the hour of the day in any one of 24 locations worldwide.

This 'city' bezel is available in several languages, while the case can be specified in steel or 18-carat red gold. Straps are either Barenia leather or crocodile leather, with 'Ocean Classic' mesh available only for the steel version.

As you'd expect from the name, the self-winding Transocean Unitime is waterproof to a depth of 100 metres. It has a 70-hour power reserve.
