Mosler MT900 S: Lean muscle

Lead

You might not have heard of Mosler, but with a racing pedigree and a Corvette-sourced V8, those with a passion for low-volume supercars should perhaps mosey around this MT900 S found for sale in the marketplace...

The colossal pulling power produced by the 5.7-litre engine (borrowed from the Corvette Z06) is obvious, but when you consider its installation in a car that weighs less than 1,000kg, it seems all the more remarkable. This 2010 example is currently being offered for just under £120,000.
