Footnote:

The acquisition of Aston Martin by Company Developments in 1972 brought with it a change of name for the

V8-engined cars: out went 'DBS V8', in came 'AM V8'. This new Series 2 was readily distinguishable by its restyled front which now featured two instead of four headlamps and recalled the looks of the earlier DB six-cylinder cars. Electronic ignition and air conditioning were now standard. Introduced in 1973, the Series 3 employed a quartet of Weber 42 DCNF carburettors instead of the previous Bosch mechanical fuel injection, the change, which necessitated a larger bonnet bulge, bringing with it increased torque and smoother running.
