Aston Martin had always planned that the DBS of 1967 would be powered by its new V8 engine, first seen in 5.0 litre form in the Lola-Aston Martin sports-racing cars. Production problems, however, intervened and the DBS used the 4.0 litre, twin overhead camshaft, straight six of the concurrently produced DB6. It was not until September 1967 that the DBS V8 was finally announced, production commencing the following April. With its platform chassis and independent suspension - coil spring/wishbone front, de Dion tube rear with Watt linkage and twin radius arms - the fine handling DBS was a perfect home for Tadek Marek's all-alloy V8. Boasting four overhead camshafts and Bosch electronic fuel injection, the 5,340cc V8 produced an impressive 320bhp at 5,000rpm and 360lb.ft; the resultant 160mph p
