Saturday 9th August 2008 Motor Cars at 17:00
Viewing: Friday 8th August from 10:00 to 19:00
Saturday from 10:00

Admission by catalogue only - admits two.

The obvious significance of the 993 is that it is the last air-cooled 911. The 993 Turbo coupé was released in 1995. It featured a new and widely acclaimed turbocharged engine displacing 3.6 litres. Twin turbochargers and air-to-air intercoolers, electronic engine management, redesigned cylinder heads and other modified engine internals were used. The 993 Turbo was the first Porsche Turbo with all wheel drive. The electronic

engine management helped the Turbo to achieve fuel efficiency far superior to any of the previous production Turbos. In connection with two catalytic converters and an on-board-diagnostics-system including four oxygen-sensors, it also made the 993 Turbo the cleanest sports car at its time. The Turbo's bodyshell
