'Performance, controllability and comfort have been combined in the Aston Martin DB4 to make it a highly desirable car: one in which long journeys can be completed very quickly indeed with the minimum of risk or discomfort and the maximum of pleasure.' - The Motor.  
Manufactured between October 1958 and June 1963, the DB4 developed through no fewer than five series. The first had already undergone a number of improvements, including the fitting of heavy-duty bumpers after the first 50 cars, before the second series arrived in January 1960. A front-hinged bonnet, bigger brake

calipers and an enlarged sump were the major changes made on the Series II, while the third series featured separate rear lights, two bonnet stays and a host of improvement
