[Road Movies: Haunting classic car imagery by Nicolas Dhervillers](#)

Lead

Young French artist and photographer Nicolas Dhervillers was commissioned to produce imagery for the recent Festival Automobile International in Paris. As you can see in our gallery, he uses eerie, deserted backdrops to bring the beauty of his chosen subjects to the fore...

Dhervillers' project, entitled 'Road Movies', sees the carefully selected classics deployed in settings dripping with atmosphere. The works hint at an underlying story much like a movie still would - with the cars invariably functioning as getaway vehicles, objects of beauty, or even cannon-fodder for gun-toting cowboys.
