[Ducati Leggero by Walt Siegl is one gorgeous lightweight rocket](#)

Lead

Austrian Walt Siegl is a living legend on the custom bike scene. In his New Hampshire workshop, he has now built a Ducati racing machine that leaves us drooling...

Unlike many other [custom motorcycles](#), the machines of [Walt Siegl Motorcycles](#) aren't meant to be decorative – they are intended as ultra-functional racing equipment. The Ducati Leggero was built for racing, based on a 900cc V-twin engine, with a frame designed on the computer and weighing less than nine kilogrammes. In other words, this Ducati is a pure powerhouse of fun.
