Drivetrain	2wd	Car type	Convertible / Roadster

### Description

---

With a body construction of high-strength fiberglass composite mounted on a 4" diameter steel tubular frame, it features aluminum fender closeout panels for both the front and the rear. Other features of this Cobra include Bilstein shock absorbers, an aluminum rear axle housing, 23 gallon fuel cell, coated headers feeding into dual side-mounted exhaust pipes, and extra electrical cooling fans for the radiator. Looking inside the cockpit of this beauty you will find a complete compliment of Shelby Signature Series Gauges, original style wood steering wheel, and confirming this cars heritage a specially cast signature ID plate is fixed to the dashboard at the factory. Completing the picture is a show quality paint scheme presenting Shelby's trademark dark blue with complimenting white stripes in a show quality finish. Since its build this CSX4000 series Cobra hasn't been a total "trailer queen" or a stashed away recluse, but has been used under strict supervision. With real-deal Cobra's hitting the million-dollar mark, here is a genuine Shelby built Cobra, that one can have a little fun with knowing it can be taken out on the road and enjoyed, with the owner knowing he is driving a real Shelby Cobra.
