Description

Last of the "Wedge" shaped TVRs, the 400SE was the top of the range from Blackpool and was produced from the late eighties until the early 1990's. A big engine in a strong but nimble chassis was a popular combination, particularly when combined with a spectacular sound track!

This car is a genuine one registered keeper from new that has covered just 22,000 warranted miles from new, most of which were covered between 1990 and 1996. More recently stored in professional storage facilities from 2006 until February this year, the car was then to receive a thorough re-commissioning at a cost of over £2,000. The car, most unusually for a TVR, has never had any cosmetic paint repair and as such offers a very rare completely original car that is backed up by a comprehensive history presented in a thick file. The original purchase invoice from The TVR Centre confirms the spec as half hide trim with Wilton carpets, power steering, a wooden steering wheel and gear knob.

It is now presented with 4 new tyres and ready to be enjoyed. A rare and exciting classic with bags of excitement and potential to have fun.
