[Boomerang generation - Bonhams to offer wild Maserati concept at Chantilly](#)

Lead

Following the success of last year's inaugural Chantilly Arts & Elegance, Bonhams has revealed the lot-list for its new companion sale, and its star consignment is the left-field 1970s concept, the Maserati Boomerang...

Trendsetter

Revealed at the 1972 Geneva Motor Show and built on Bora underpinnings, the [Boomerang](#) was designed by Giorgetto Giugiaro (then at Italdesign), who said the car was drawn “almost entirely with a ruler”. What’s more, the Boomerang was among the first angular design studies, of which many more – bolstered by their popularity – would follow throughout the decade. Perhaps unsurprisingly, the pre-sale estimate is available on request only. If you’re keen on ultra-rare coupés, the one-of-a-handful Aigle-bodied Alfa Romeo 1900C Super Sprint is also offered at the sale. And on this week’s topic of [ultra-low-mileage classics](#), how about a Lancia Aurelia B52 with just 3,700km from new?
