

CLASSIC DRIVER

[This is how you drive a classic Porsche 911](#)

Lead

In this video, driver and presenter Tim Schrick proves that you don't have to drive a classic Porsche 911 as though it were as fragile as an egg, by drifting the air-cooled, 980kg, 360HP monster around the port of Rotterdam....

Admittedly, this isn't any classic 911, rather one that's been extensively modified with new technology and design elements by Porsche specialist [Lightspeed Classic](#). While we're purists at heart and would take an original car every time, Lightspeed's 911 does look like a honey to drive.
