Chassis No.

1GKS1JKJ2FR307227

Estimate:

\$ 90,000 - \$100,000 US

For GMC, designing, engineering and crafting the 2015 Yukon meant bringing together hundreds of innovations to create a sports utility vehicle above all competitors. Yukon combines powerful, efficient engines and a quiet, spacious interior that's chocked full of premium materials and inventive technologies. The result of this forward thinking was a whole new Yukon. With the Denali, you will find aluminum trim, premium leather accents, fine stitching and quality woodgrains that look and feel real - because they are.

This silver Yukon XL Denali has tan interior and has been transformed from its original 420-hp stock configuration in what is described as "one of the most powerful XL Denali's in the world." The 6.2-liter V-8 engine now produces a whopping 765 horsepower. The extreme advancement in power is reported as being achieved through force induction and internal engine component exchanges that include larger camshaft, higher flow injectors, CNC cylinder heads and solid lifters. Efficiency of the exhaust system comes through the headers, high flow convertors and dual exhaust.

This Yukon XL Denali has a custom stance and is nicely complemented by chromed alloy wheels, automatic transmission, radio, air conditioning; power brakes, steering and windows. This is truly a combination of beauty and beast – there is power to spare and the fully appointed cabin offers luxury abound. This vehicle has been driven sparingly and its condition is commensurate with this careful usage.
