[This custom Triumph Scrambler screams Spanish sass](#)

Lead

From Hinckley to Alicante – at Taramit Motorcycles, British Triumphs are transformed into hot-blooded Spanish beasts. Its latest range of scramblers would have made Steve McQueen and Bud Ekins very happy indeed...

In addition to Triumph parts and accessories, the team at [Taramit Motorcycles](#) produces a number of custom bikes, with quirky names such as 'Super Lopez', 'Santa Maria' and 'Superstar'. While most of its creations are based on the Bonneville, its latest offering uses the Triumph Scrambler as its basis. Dubbed the 'Number 216', it's equipped with a number of in-house manufactured parts designed to maximise the bike's off-road capabilities. With its dramatic Papillon exhaust and chunky Continental tyres, we'd love to climb astride this Triumph and set off across Spain's hinterlands.
