
Would you be seen dead in this Maserati Ghibli hearse?

19 October 2016 | Joe Breeze

With Halloween approaching, you could be forgiven for dismissing this 'extended wheelbase' Maserati Ghibli as a designer's apparitional vision. But no – an Italian coachbuilder has actually transformed the four-door saloon into funeral transport...

If you're going to be buried in your best Italian suit, you might as well ride to your final destination in a car of the same origin, right? Perhaps that makes sense in theory but, while Piedmontese funeral car builder [Ellena Autotrasformazioni](#) has created a surprisingly cohesive design, we can't help but wonder if a diesel-engined sports saloon was the ideal donor car. Surely a [Rolls-Royce Phantom hearse](#) would be more appropriate, in more ways than one?
