Celebrate the colours of speed with these tasteful prints

Lead

More often than not, the most significant racing cars from motorsport history are just as recognisable for their colour schemes as they are for their drivers, bodywork, or achievements. And that's exactly what Unique & Limited has focused on with its tasteful 'Colours of Speed' collection of prints...

Heavenly palette

The amalgam silver, blue, and red on Porsche's Martini-liveried 911 RSR; the distinctive Swedish blue and yellow of Ulf Norinder's Ferrari 250 GTO; the yellow nose of Juan Manuel Fangio's otherwise all-red Maserati 250F — they're cars and colours that stir up emotions at the mere thought. Now, the digital wizards at Czech-based gallery Unique & Limited have devoted an entire collection to these automotive icons and the colours in which they competed. There's bound to be one of the set — be it the record-breaking Porsche 911 R or the Le Mans-winning Ford GT40 — that colour coordinates with a wall in your office or lounge.
