## [25 years of analogue love with the Lomography LC-A](#)

### Lead

Who doesn't love an anniversary? We can't get enough of them, especially when it results in fun, new kit to add to our growing commemorative collections. Lomography has just released a new 25th anniversary LC-A camera and we can't wait to get our hands on one...

### 25 to life

Dedicated to analogue, experimental, and creative photography, Lomographers the world over are celebrating the 25th anniversary of the iconic LC-A camera. Christened the LC-A+, the special edition has a black metal body, a brown leather wrapping and camera strap, and is fitted with a built-in Minitar-1 32/2.8 lens. In honour of the milestone, each LC-A+ is embossed with '25 years. No rules. Happy mistakes. Analogue love' on the back and is priced at 289 GBP. Along with the LC-A+, two additional anniversary editions — the LC-Wide and the LCA-120 — have also been announced and can be had for 329 and 339 GBP, respectively.
