

CLASSIC DRIVER

Ayrton Senna as you've never seen him before in this sensational new artwork

Lead

If you were at Rétromobile last week, you must have come across Unique & Limited's eye-catching stand. For there was not only a large-scale print of Ayrton Senna and his McLaren MP4/4 at the 1988 San Marino Grand Prix but also an Amalgam model of that very car on display...

The Best and the Rest

In its latest collaboration with McLaren, Unique & Limited has recreated the moment Ayrton Senna overtook Nelson Piquet in a race for victory at the 1988 San Marino Grand Prix. While smaller prints are available on request, five large-scale CGI prints will be made, with one being accompanied by a 1:8 scale model from Amalgam of the very MP4/4 depicted in the print — finished with a slightly weathered appearance, as if it had just crossed the finish line and driven straight out of the frame.
