Lot number	21		

### Description

This Mercedes A class is in a moving condition. The car is equipped with an automatic transmission. The interior and exterior have some minor imperfections but look good overall. The car is regularly maintained by the current owner. A few months ago, the car still had major maintenance, including the brake pads, brake discs and rear springs have been replaced and the car has two new front tires. There are several invoices present, as well as the original booklets. The car was originally delivered new in the Netherlands and at the RDW is to find that the car has a logical mileage. All electronics work, but in all likelihood the fan control must be replaced for the proper functioning of all ventilation positions. This part is already present at the car. There are also rubber mats present at the car. There is a valid APK up to and including 15-06-2019. To get a good idea of the lot, we advise you to come to one of the viewing days.
