## The Mechanists' bracelets put automotive history on your wrist

25 March 2020

Classic Driver

Finding accessories that express your passion for fine motorcars and timeless design is easier said than done, with so many out there that fall on the wrong sides of elegant, tasteful and discreet. The wonderful bracelets and keyrings from The Mechanists are an exception...

Hand-crafted from sterling silver and 14-carat gold in the United Kingdom, the beautiful bracelets from [The Mechanists](#) feature icons of automotive history, such as the steering wheel from the Jaguar E-type and the Fuchs alloy wheel from the Porsche 911. They're threaded onto a sterling silver chain or a selection of high-quality coloured cords (inspired by legendary car colours such as British Racing Green and Guards Red) and are the perfect accessory to complement your

mechanical watch or simply brighten up your wrist this summer.
