Approximate price

**USD 358**

Currency converted from 295,00 EUR  
Final price may vary

Location

Year of manufacture

2020

### Description

Vicuña was named after the fabric used by the ancient Incas to create outfits fit for kings. These sunglasses have green lenses and a rounded frame made of 24k gold, handmade in Italy. The models range from pure rhodium to blends of rhodium with 2 microns of 24-carat gold and 2 microns of palladium. This combination makes for a unique coating, 80 times more resistant compared to other frames available on the market. Extraordinarily lightweight, they lend themselves to both tailored wear and formal occasions.

Delivery: 1-3 working days.
