		Car type	Custom

Description

See the full description here <https://getyourclassic.com/item/enzmann-506/>

Up for auction is an original Enzmann 506 Spyder Series II of which a total of 9 vehicles were built between 2006 and 2014. Using the original negative mould, which was stored outdoors for a long time and painstakingly restored after being bought back, Kari Enzmann, the son of the designer, and his partners Werner Schreiber and Walter Gossweiler in Bischofszell, in eastern Switzerland, produced a small number of new bodies on historic Beetle chassis in their spare time. The vehicle offered here is the last or penultimate of a total of 9 produced vehicles.
