### Description

Ferrari Monza SP1 and SP2 - inspired by the legendary Ferrari racing Barchettas

Amalgam has a long and close association with Ferrari; since 1998 we have modelled many of the most significant Ferraris ever built. On that journey we have developed a deep knowledge and experience of these extraordinary pieces of engineering art, delivering the world's best large-scale models representing every strand of Ferrari's DNA. From the 1950s classics through to the LaFerrari Aperta we have created perfect scale replicas both for Ferrari and for collectors worldwide. Our models of the Monza SP1 and SP2 continue that tradition with exceptionally detailed and accurate representation of the design, details and finishes of these beautiful cars.

Ferrari Monza SP1 and SP2: the first of the new 'Icona' series drawing their inspiration from the most evocative Ferraris of the 1950s and featuring the most advanced automotive technology available today.

Aimed at dedicated clients and collectors, the Monza SP1 and SP2 reference the iconic Ferrari racing barchettas of the past, not least the 1948 166 MM, which originally inspired the name 'barchetta', and the 750 Monza and 860 Monza. Designed with the sole aim of winning, these uncompromising race cars helped build the Ferrari legend in the 1950s by delivering numerous victories in the World Sports Car Championship.

The Ferrari Monza SP1 and SP2 were designed as an uncompromising single-seat road car that offers a truly unique experience behind the wheel. It features a unique design, the best weight-to-power

ratio of any barchetta, thanks to the extensive use of carbon-fibre in construction, and distinctive details, such as head-and tail-lights, wheels and interior, which further enhance the cars' exclusivity. Equipped with the most powerful engine Maranello has ever built, a 810 cv V12, they can sprint from 0-100 km/h in 2.9 seconds and 0-200 km/h in 7.9 seconds.

This fine scale model has been handcrafted and finished in our workshops with the co-operation and assistance of the manufacturer regarding original finishes, materials, archive imagery and drawings. The use of original CAD supplied by Ferrari has allowed us to perfectly recreate every detail at scale. Furthermore, the prototype model has undergone detailed scrutiny by the manufacturer's engineering and design teams to ensure complete accuracy of representation.

The Ferrari Monza SP2 is limited to just 199 pieces.
