Saying farewell to winter in Meribel with a Fiat Panda 4x4

Lead

As the sun starts to shine brighter everyday, it's almost time to put away the Panda until next winter and of course the St Moritz Panda meet! When in Meribel, it's important to just give the Panda that final shakedown!

This is a 1987 Fiat Panda 4x4 special series "Val d'Isere". The 'must-have' Panda in the Alps during the 1992 Albertville Olympic Games. One of the most emblematic versions of the Panda 4x4 with its white and red paint, its inclinometer and its air intake on the hood. This model pictured was purchased from owners who used it as a vacation car in Meribel, French Alps. Visually the car is clearly in very good condition but its new owners wanted to check its incredible talents on the snow before it all melts away in the spring sunshine. So, off they headed to the runway of the Altiport of Meribel to see what this Italian jewel can do.
