Drivetrain	2wd	Interior brand colour	Can be specified
		Electric windows	Yes
		Climate control	Yes

### Description

---

We are delighted to bring to market an early build electric 911, redefined by Everrati, that could be on your drive in a few months. The car offered is a "Pure" edition Targa narrow body specification. Colours and trim can still be chosen for a client that can move quickly. Other extras such as active sound, rear ducktail, custom audio and upgraded trim and paint finish among others are also still available.

This car has commenced the full Everrati restoration process: the chassis has already been bare-metalled and e-dipped and all major components are renewed or refreshed.

The meticulous development process starts with 3D scanning and CAD designed powertrains which are measured and weighed to ensure that packaging is optimised and the weight distribution will be the same as the original. This ensures the car has the classic 911 weight distribution characteristics of massive traction and retains unbelievable steering feel.

Some of the world's leading engineers (ex-McLaren, Noble, JLR etc) have developed and honed the

EV drive system and achieved a very linear power delivery, matched with the afore mentioned steering feel this delivers a driver's car par-excellence.

The motoring press has universally praised this car and it has been described as "The most analogue EV ever built."

To find out more about how to jump the waiting list into this production ready car get in contact today.
