

CLASSIC DRIVER

It's all in the details with Placek Classics' Porsche accessories

Lead

The Porsche boom has been led by one defining word; Individuality. Just owning a 964 Carrera 2 in your favourite hue is not enough, it's all about those extra touches that make it stand out from the crowd.

Justin Placek has been creating beautiful interiors for Porsche aficionados for many years, reintroducing some of those legendary materials we love. Fabrics like pascha, tartan and other classically inspired leather and fabric patterns and colours are masterfully incorporated into modern interiors. More recently, Justin has tuned his talents to creating bespoke versions of the iconic MOMO Prototipo and 07 model steering wheels. These are made to order, and Justin will work closely with you throughout to ensure the perfect finishing touch to your car.

And for your Porsche tools, how about a bespoke tool bag, currently offered in Cognac, Navy, Black and Green, with contrasting fabrics inside such as pepita or tartan. [Check out the current range in the Classic Driver Shop](#) or get in touch with Justin to discuss your specific requirements. Of course, it doesn't have to be a Porsche!
