- **Location** 
- **Fuel type** Petrol
- **Exterior colour** Blue
- **Car type** Single seater
-

Description

This show car is one of only three made by Williams and is reportedly the of the only two remaining. All body panels are said to be genuine FW14 components, as are the suspension, carbon Brembo disc brakes and the Alacantara-wrapped carbon seat. Car comes with original invoice made in 1992 to The the buyer.

For those who are long-standing supporters of the Williams team, which was founded in 1977 by Frank Williams and Patrick Head and went on to achieve nine F1 world championships and seven driver's titles, this is a rare chance to secure a replica FW14 that would be a talking point in any collection - even without its powertrain. Mansell's championship-winning FW1B sold at auction in 2019 for £2.7m but this replica is offered without reserve at the Silverstone Auctions Race Retro Live Auction on March 27.

Ask for any further inquiry, important price!
