Description

When BMW dealer Remeeus from Ouwerkerk Zeeland delivered this 325i in November 1986, it was probably one of the most complete 3 series they could deliver. The first owner had ticked a lot of options. At the bottom of the original purchase invoice, which is present, was a total amount of 72,395 guilders.

Mr. Flikweert from Nieuwerkerk, also in Zeeland, was the lucky owner and has pampered and maintained this car in a truly unique way. From day 1 and from the first kilometer a detailed log was kept every year in which every kilometer driven was recorded and all bills and fuel receipts were kept. These papers are available from all the years that Flikweert was the owner. Of course, the entire maintenance history was also filled in and this is complete and in perfect condition with the car.

At the end of 2005 the car was sold to a fellow citizen. The odometer was then at more than 189,000 km. This owner has always stored the car indoors and only used it sporadically. We recently bought it with 191,500 km and first carried out major maintenance with timing belt.

The condition is absolutely stunning! As if the car has just come out of the showroom at Remeeus. A real time capsule and a unique opportunity for a real enthusiast to become the third owner of this very special 325i!
