Description

This Volkswagen T1 Microbus Deluxe with 21 windows (nicknamed in Europe as a "Samba") is completely restored a couple of years ago and still in fantastic condition. It has the sought after Safari front windows, and has the correct folding cloth sunroof. The last owner made it even more "flower power" by adding some flower stickers on the car, but these are easily removable if required. These beautiful VW Split-window buses are very much collector items today, and finding one in this beautiful condition is rare.
