

CLASSIC DRIVER

[Orange you dreaming of taking this stunning Alfa Romeo Montreal for a spin?](#)

Lead

There's a plethora of eye-catching classics going under the hammer with Oldtimer Galerie Toffen's upcoming Swiss Classic World Lucerne sale on May 28th, but this orange Alfa Romeo Montreal is what really grabbed our attention.

If your garage has a space or two that you're dying to fill with another dream-worthy classic car, then mark May 28th in your calendars because [Oldtimer Galerie Toffen's upcoming Swiss Classic World Lucerne sale](#) is bursting at the seams with precious metal. This [1972 Alfa Romeo Montreal](#) finished in AR 601 orange immediately caught our attention, more specifically because we just can't get over how beautiful the Montreal's front end is. With that lovely NACA duct on the bonnet and those alluring slatted headlight covers, the Montreal looks every bit the 70s supercar from the front, and of course the rest of it is certainly easy on the eyes too! This example enjoyed a full repaint in its original colour in 2020, while a mechanical refresh has also been completed to ensure that the engine and gearbox are in full working order. However, there are plenty more classics for you to daydream about, so check all the lots [here](#).
